

1. Competitive bromination kinetic study of C₂H₆, CH₂ClBr and neo-C₅H₁₂. Reaction kinetics and thermochemical implications, R. Nádásdi, I. Szilágyi, J. Zádor, G. Zügner, S. Dóbbé, T. Bérces, F. Márta, *Proceedings of the European Combustion Meeting ECM 2007*, 111–114, **2007**.

2. Rate constant for the reaction of bromine atoms with ethane: kinetic and thermochemical implications, G. L. Zügner, I. Szilágyi, R. Nádásdi, J. Zádor and S. Dóbbé, *React. Kinet. Catal. Letters*, 95., 355-363, **2008**.

3. Experimental and theoretical study of the reactions C₂H₅CO + O₂ and CH₃CHC(O)H + O₂, R. Nádásdi, I. Szilágyi, G. L. Zügner, S. Dóbbé, J. Zádor, X. Song and B. Wang, *Proceedings of the European Combustion Meeting ECM 2009*.

4. Photolysis quantum yield and UV absorption spectrum for methyl-ethyl-ketone, R. Nádásdi, G. L. Zügner, M. Farkas, S. Dóbbé, E. Szabó, A. Tomas, C. Fittschen, *J. Photochem. Photobiol. A: Chemistry*, **2009**.
